'Arcadia', Foster South, Gippsland

Dear Enviromeat customer,

We feel privileged to live in the rolling hills of South Gippsland, with a magnificent view which takes in Corner Inlet and Wilson's Promontory.

Our home farm 'Arcadia' consists of 48 ha of hill country. At Fish Creek our farm known as 'Mackins' comprises a further 128 ha of gently undulating plains. We also lease another 450 ha in East Gippsland.

The farming enterprise includes 400 Angus breeders and between 400-500 steers. Caring for the environment is a high priority on both farms.

Our efforts have included planting trees and fencing off remnant vegetation and creeks. In doing so we are protecting our waterways and providing wildlife corridors. Regular testing of creeks as they leave each property monitors whether we are meeting our aim of improving water quality.

When deciding to participate in the Environmental Management System (EMS) Project, we felt the programme reflected our values and matched our farming principles.

Through our participation in EMS we have been able to further identify problem areas and put management practices into place to overcome these problems.

We hope you enjoy our 'Enviromeat'.

David & Linda

- ✓ Environmentally certified
- ✓ No artificial hormones
- ✓ Free range
- ✓ Guaranteed tender

We are farming for the long term to guarantee you have the best quality meat both now and into the future.
